- Bamboo fabric cover to inhibit dust mites and reduce allergic reactions.
- Measures: 72cm (width) x 140cm (length) x 17cm (depth).
- Turn with seasons (please see caring for your mattress)

CARING FOR YOUR MATTRESS

A mattress is an investment, so Hector & Queen recommend the use of mattress protectors to help shield them from those little accidents. A good quality, cotton faced mattress protector under your bed linen will help to avoid stains and promote hygiene. For younger children, Hector & Queen recommend a waterproof mattress protector to guard against any accidents which may occur during the night.

It is recommended that you turn and rotate your mattress once a week during the first three months, after which time, a seasonal rotation should be sufficient. A high quality mattress is upholstered with various fillings on both sides and turning and rotating it in this way, allows even settlement of both sides of the mattress.
